

In Saxony, you can really get your education moving

Saxony has a long-standing tradition as a first-class address for university education. More than 110,000 students, including 12,000 international students, benefit from upwards of 450 modern and multi-faceted degree programmes.

You can choose between internationally recognised Bachelor's and Master's degrees, state examinations to acquire teaching qualifications or the highly-respected German "Diplom" in Engineering. This is one of Saxony's particular strengths: Almost 30 per cent of all students enrol in courses leading to engineering degrees.

Saxony offers excellent tertiary education – with no tuition fees. Students are offered both efficient study programmes and excellent supervision, which is why most of Saxony's degree programmes are completed more quickly than the national average for Germany as a whole.

The universities and colleges in Saxony are superbly equipped with state-of-the-art laboratories, libraries and computer workstations.

Career opportunities in both commerce and science abound in Saxony. Many businesses can look forward to employing well-trained professionals in the years to come. Those interested in research will discover a tight network of excellent research facilities. Almost 50 non-university research institutes are located in the Free State of Saxony. Only a few German federal states have achieved this level of diversity.

And, of course, much more awaits you in Saxony: beautiful cities and wonderful countryside, a wealth of culture and youth hotspots as well as open-minded, tolerant people.

Hope to see you here soon!

Universities

The Saxonian cities of Leipzig, Dresden, Chemnitz and Freiberg are all university centres rich in tradition, each with a broad spectrum of subjects on offer in the fields of Engineering, Natural Sciences, Humanities, Social Sciences, Business Administration and Law.

Technische Universität Chemnitz

86 Courses of Study | **11,000 students** | **8 Faculties**
█ Natural Sciences **█** Mathematics **█** Mechanical Engineering **█** Electrical Technology and Information Technology **█** Computer Sciences **█** Economics and Business Administration **█** Humanities **█** Behavioural and Social Sciences

University of Cooperative Education

Saxony offers a dual-course study system, combining theoretical and professional training at the "Berufsakademie" (University of Cooperative Education). This tailor-made programme offers both academic and hands-on experience at seven locations in Bautzen, Breitenbrunn, Dresden, Glauchau, Leipzig, Plauen and Riesa. It is designed for those who would like to complete their Bachelor's or Diplom degree in three years and features small seminar groups, compact courses, training allowances and no numerus clausus.

Universities of Applied Sciences

For those who are seeking a practice-oriented course of study, they cannot go wrong with one of the five universities of applied sciences. Here you can acquire an university degree in the following fields: Engineering, Business Administration, Media Sciences, Social Sciences or Arts.

Hochschule für Technik und Wirtschaft Dresden

University of Applied Sciences
Approx. 40 Courses of Study (all in German) | **5,300 students** | **8 Faculties**
█ Civil Engineering/Architecture **█** Electrical Engineering **█** Spatial Information **█** Design **█** Informatics/Mathematics **█** Agriculture/Landscape Management **█** Mechanical Engineering/Process Engineering **█** Business Administration
